STRIKER®

Take on ARFF hazards with extreme precision in the most unforgiving conditions. The Oshkosh® Striker® vehicle optimizes vehicle performance, response flexibility with available Snozzle® HRET, and true pump and roll in any condition.

UNMATCHED CHASSIS PERFORMANCE

- Exceeds NFPA, ICAO, FMVSS and EU standards
- Oshkosh patented TAK-4® all-wheel independent suspension
- Center steer for greater all-around visibility and control
- Electronic Stability Control (ESC) and side airbags available as options
- Oshkosh mechanical rear steer available

INNOVATIVE FIRE SUPPRESSION

- Oshkosh power divider allows for pump and roll in any condition
- Available Snozzle® HRET with 50' or 65' (15.2m or 19.8m) reach
- Dual crosslays allow access to handlines from either side of the truck
- Choice of standard pressure or ultra-high pressure pump systems
- Options for auxiliary firefighting systems include: 3M NOVEC 1230, CAFS, Halotron, and Dry Chemical Powder

SMART DESIGN

- Modular cab layout with switching and controls logically placed
- Spacious cab seats up to 5 firefighters
- Industry-leading forward visibility
- Walk-in rear service compartments allow for easy maintenance
- Oshkosh Command Zone™ system with built-in diagnostic support
- Oshkosh CARE™ clean cab system for increased carcinogen protection

COMPLETE SUPPORT

- 24/7/365 global support
- Comprehensive parts/technical support at
- Dedicated professional operators and maintenance training available
