## Upcoming Classes

Oshkosh, WI

### Gen 2 & 3 Striker ARFF 5-day Chassis Maintenance & Troubleshooting

This course familiarizes service personnel with the vehicle chassis and power-divider components. The students will learn proper operation, lubrication, adjustments, preventative maintenance, and trouble-shooting procedures for the following systems: power distribution, engine, transmission, ABS and suspension.

- January 23 - 27, 2023
- June 12 - 16, 2023
- August 21 - 25, 2023

### Gen 2 & 3 Striker ARFF 5-day Firefighting Maintenance & Troubleshooting

This course familiarizes service personnel with the vehicle firefighting systems and components. The students will learn proper operation, lubrication, adjustments, preventative maintenance, and troubleshooting procedures for the following systems: water pump, turret, hand lines, dry-chemical, and clean agent systems

- January 30 - February 3, 2023
- June 19 - 23, 2023
- August 28 - September 1, 2023

## Learn from our Experts

When it comes to expert instruction in repairs, maintenance, and trouble-shooting Striker ARFF vehicles, our training is in a class by itself.

Our training specialists are vehicle experts and understand the needs of the students. Your mechanics will get in-depth, hands-on training they need to increase readiness, performance, and productivity.

## Ahead of the Learning Curve

We have developed a blended approach to training which leverages the advantages of both classroom and shop experiences, combining them with advance 3D modeling, virtual task trainers, online learning, and hands-on experience. Our training methodology prepares you with advanced, realistic troubleshooting experiences.

Class sizes are designed to offer students greater hands-on experience and instructor interaction.
