KEEPS FOAM IN RANGE AND OFF THE GROUND.

Measure foam percentages from every discharge on the vehicle. The new Oshkosh® Eco EFP™ system requires zero foam on the ground for testing foam percentage.

Eco EFP measures both the solution and foam flows on the vehicle, and even archives the testing data with a time and date stamp for three years. It’s the only foam measuring system that’s fully integrated on the vehicle.
SAFE. NEVER WASTES.

OPERATION
• Patent-pending system tests foam percentages using only water
• Decreases environmental concerns with foam discharging
• Entire system accessed with one display on the pump panel
• System prompts provided for easy step-by-step use
• Ability to test without the expense of using foam

INFORMATION
• Has archive for all data back three years
• Shows last test data for easy reference
• Includes time & date stamps
• Data is downloadable via USB

INTEGRATION
• Uniquely configured on-truck with no other equipment needed
• Simple to use interface screen
• Measures actual solution flow for highly accurate foam percentage readings
• Works in conjunction with the Oshkosh® electronic foam proportioning system
