

READINESS.
ALL THE TIME.

TELEMATICS

Get total visibility of fleet readiness without getting bogged down in data drag. Runway Ready™ telematics master system connectivity without complexity.

Reporting services are automated for instant maintenance alerts. These alerts can be managed online with at-a-glance color coding. Every monitor, fault tracker, and notification supports the response of your equipment - in real time, at your desktop or on your phone.

CONNECTIVITY = READINESS.

TELEMATICS

ADVANTAGES

- Provides maintenance & readiness data to fleet & fire operations
- Remote notifications on maintenance needs & service issues
- Proactive monitoring identifies issues before they impact the vehicle
- Readiness feature reveals capabilities of ARFF fleet at any point in time
- Increases vehicle uptime

MONITORING

- Displays water, foam, fuel, & DEF levels
- Eases equipment tracking via web application
- GPS location tracking communicates how/when/where equipment is used
- Fault tracking & notifications provided at a glance

MAINTENANCE

- Rapid access to machine maintenance history
- Diagnoses machine problems
- Reduces unexpected failures & total cost of ownership
- Helps you stay in front of your maintenance

INTEGRATION

- Available on all new Striker models
- Factory-installed control unit communicates directly with the drivetrain & firefighting systems
- Through a robust cellular connection, all relevant data is transmitted to your phone or web application
- Oshkosh® telematics are fully integrated, comprising the only system designed for Oshkosh ARFF apparatus
